Executive Summary

Results-oriented and detail-driven IT Professional with 2 years of experience in L1 Production Support in the Investment Banking domain. Adept in application monitoring, incident resolution, and production stability. Strong hands-on experience in Oracle SQL, SQL Server, Linux, and Shell Scripting. Proven track record in managing job scheduling, analyzing logs, and minimizing system downtimes using tools such as Splunk, Graylog, Active Batch, and Jira Service Management. Skilled in conducting root cause analysis (RCA) to identify recurring issues and drive permanent fixes. Experienced in preparing detailed documentation and status reports for internal stakeholders. Known for quick learning, adaptability, and proactive problem-solving in high-pressure environments.

TECHNICAL SKILLS

Database: Oracle SQL, MySQL

Ticketing Tools: Jira Service Management

Operating Systems: Linux

Monitoring Tools: Splunk, Graylog

Schedulers: Active Batch

Others: Incident Management, Problem Management, Change Management, Application Support, RCA, SLA compliance.

WORK EXPERIENCE

Production Support Engineer (L1 Support)

Tata Consultancy Services AUG (2023)-JULY (2025)

Client: Bloomberg

- Delivered L1 support for business-critical investment banking applications, ensuring minimal service disruption.
- Resolved incidents efficiently using Jira Service Management, consistently meeting or exceeding SLA timelines.
- Utilized Splunk and Graylog for real-time and historical application log monitoring and alert analysis.
- Managed job scheduling, execution, and error resolution using Active Batch across multiple environments.
- Wrote and optimized Shell scripts for log parsing, monitoring automation, and routine task simplification.
- Performed RCA and collaborated with development teams to implement longterm fixes and improvements.
- Participated in weekend release validations and disaster recovery (DR) drills with full post validation support.
- Created and maintained detailed knowledge base documentation to streamline onboarding and issue resolution.
- Provided on-call support during critical system outages and high-severity incidents. Coordinated with cross-functional teams to ensure timely implementation of change requests and hotfixes.
